

The storage tank (Bulkstream) is an open to vent tank and operates as a thermal storage vessel. (1,2,3)

The heat exchanger is in turn connected to the main (cold) supply, through the heat exchanger for point of use at the rated pressure of the incoming cold supply. (4,5)

FOR TOTAL RELIABILITY YOU CAN COUNT ON!

2000 l Bulkstream with up to 12 ports provided (see indication as typical design). Fitted with heat exchanger.
