

The storage tank (Bulkstream) is an open to vent tank and operates as a thermal storage vessel. (1,2,3)

The heat exchanger is in turn connected to the main (cold) supply, through the heat exchanger for point of use at the rated pressure of the incoming cold supply. (4,5)

**FOR TOTAL RELIABILITY YOU CAN COUNT ON!**

**650l Tank with up to 12 ports provided.**  
 (See indications as typical design)  
**Fitted with heat exchanger**

**SINCE 2003**
